

Joanna McAfee Childhood Cancer Foundation

help today. hope tomorrow.

Dear Family,

We, Jeff, Misty, & Paul McAfee of Warner Robins, founded the **Joanna McAfee Childhood Cancer Foundation** after losing our precious 6-year-old daughter & sister, Joanna, to Alveolar Rhabdomyosarcoma on December 22, 2005 (Joanna's Story:

www.caringbridge.org/visit/joannamcafee). We have been in your position and we want to help you and your family if we can.

Since we lived in Tampa when our daughter was diagnosed, Joanna received treatment at All Children's Hospital in St. Petersburg, Florida. Throughout her 3-year battle, there were two local organizations, the Pediatric Cancer Foundation and the Children's Cancer Center, that "took care of" pediatric cancer families in the Tampa/St. Pete area. They provided love, support, entertainment for our family outside of treatment, entertainment for our children during treatment, and so much more. Most importantly, they provided hope for our children's future by raising much-needed funds for pediatric cancer research.

The **Joanna McAfee Childhood Cancer Foundation** wants to be that organization in the Middle GA area. We want to be the people who make your life a little easier, consistently providing compassion & hope, and granting those so-important opportunities for joy & laughter whenever we can.

We are just beginning our "support" part of the Foundation and we are learning a lot. On the other hand, we've started our work with invaluable knowledge – we've experienced your battle and we have excellent examples of service organizations to follow.

Because the hospitals and doctors cannot provide us with your names (due to the privacy laws), if you are interested in being contacted when we have services, tickets, prizes, etc. available, please fill out the info sheet attached. And please, SPREAD THE WORD! We are here to help you!

Much love and hope,

The McAfee Family
